

445. Add Two Numbers - II

You are given two **non-empty** linked lists representing two non-negative integers. The most significant digit comes first and each of their nodes contains a single digit. Add the two numbers and return the sum as a linked list.

You may assume the two numbers do not contain any leading zero, except the number 0 itself.

Example 1:

Input: l1 = [7,2,4,3], l2 = [5,6,4]

Output: [7,8,0,7]

Example 2:

Input: l1 = [2,4,3], l2 = [5,6,4]

Output: [8,0,7]

Example 3:

Input: l1 = [0], l2 = [0]

Output: [0]
